### **Future Prospects**

### Industry:

It is anticipated that local demand of cement may increase due to expected government spending on infrastructure projects. Proper and efficient utilization of allocated development funds by the provinces would help the sector to grow. Some control of terrorism and continuous positive pressure of opposition on the government may also prove to be trigger point of the revival of industry and may contribute positively towards overall consumption.

### Company:

Energy efficiency, labour efficiency & productivity and right financial modelling, smooth plant operations are key factors to success of any cement plant. The management is committed for a balanced delivery of long term values to all stake holders including financers, creditors, employees and shareholders.

### Company's Plans

Sponsors of the company are considering various options to arrange/inject some funds to support negative cashflows of the company especially for the repayment of past dues of the company and for replacement of old electric infrastructure to reduce the power and fuel cost which is the major cause of loss sustained by the company in past years.

#### Change in management

After the period under review, on May 11, 2015 all the directors of the company have been reappointed after their retierement.

### Acknowledgement

The board of directors is thankful to all stakeholders including but not limited to bankers, employees, suppliers, distributors as well as regulators and shareholders for their continued support, cooperation and trust especially in crises tenure faced by the company in the current period.
